

black dot 24

sedus

+++ The swivel chair with the extra strengths +++

With "black dot" and "black dot net" Sedus has proven swivel chairs in its programme, characterised by the dorsokinetic backrest and thus providing maximum freedom of movement. In a nutshell: pure dynamic sitting.

Now "black dot 24" is available. This special version of the black dot swivel chair is particularly suitable for heavier people and also meets the high demands of use in 24 hour workplaces, for example in control centres or reception areas.

+ Its strengths at a glance.

- User weight up to 150 kg
- Sliding seat with larger upholstery dimensions
- Similar mechanism with reinforced springs
- Dorsokinetic backrest
- 3D adjustable armrests
- Air- and moisture-permeable upholstery
