When the conference table is your

# workplace, it's got to be right: Sedus mastermind.

When important decisions have to be made, people tend to meet for a “roundtable” discussion. There, it is expected that everyone will “lay their cards on the table”. It is clear from these and many other common figures of speech how central a role the table plays when people sit down together to solve problems, discuss options and make decisions; activities which, nowadays, take up a large part of knowledge workers’, managers’ and business peoples’ working day. The Sedus mastermind provides a functionally perfect, versatile and highly aesthetic table system for all kinds of meeting and conference. It includes a variety of individual tables for smaller meeting rooms as well as a modular system for conference suites of all sizes, and even highly individual customised solutions.

Design: Markus Dörner

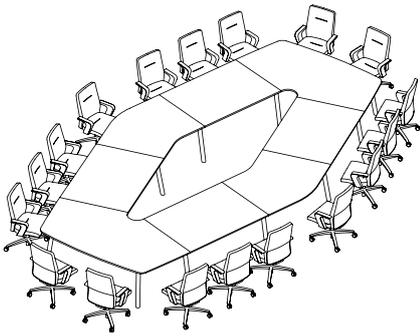

## Show your communicative side.

Be it a grand conference room for high-level discussions or a small meeting room for a project team brainstorming, in the centre is always the table at which everyone meets. How the tables are combined determines how people interact and communicate within the room. Enough personal space and plenty of room for presentation materials, papers and beverages; surfaces that are pleasant to the touch; the integration of all requisite media, without interfering cables; solid construction and, not least, the right proportions and visual quality. These factors are all crucial in allowing the participants in the meeting to get the best out of themselves and the situation. And Sedus mastermind delivers in its own unique way – with pure elegance, straightforward simplicity and sophisticated functionality.

### **Large conference.**

Sample configuration with 18 elegant swivel chairs. The rhombus shape is communicative. Dimensions: 7.0 m x 3.8 m.

**The decision ring.**

Circular suites enable all participants to make eye contact.

Designed for 18 conference swivel chairs.

Dimensions:

4.5 m x 3.7 m.

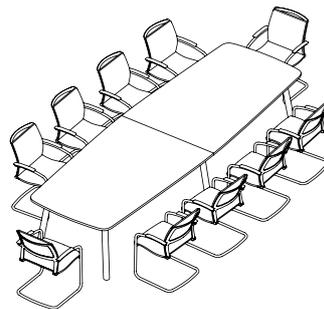

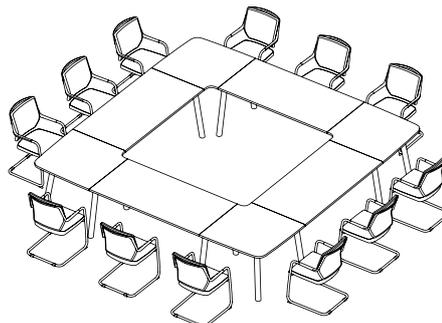

## The table system with endless possibilities.

Conference and meeting rooms define parameters through their size, shape and layout. Sedus mastermind, the comprehensive table system, allows for the ideal table solution to be created to suit the situation in hand. Attractive individual tables in different shapes are best suited to small- and medium-sized meeting rooms, whilst large conference suites of any configuration can be created with the modular tables. What's more, the clever frame system makes it easy to create tailored individual suites of tables.

**All aboard.** Example of individual tables in the shape of a boat for up to 10 people. Dimensions: 3.8 m x 1.25 m.

**Well-balanced.** Example of a square modular suite for up to 16 participants; combined here with crossline cantilever chairs; seat width: 700 mm. Dimensions: 3.3 m x 3.3 m.

# The perfect basis for efficient meetings.

For everyday teamwork and project work in the office, smaller-scale, versatile meeting facilities are essential. The attractive individual tables from the Sedus mastermind range tick all the boxes. They are available in round, curved triangle, square, rectangular or boat shape, and seat from four to 14. Their refined, simple design and the variety of finishes and colours on offer mean they harmonise with any given room situation. As part of the products' integral concept, tables can be optimally combined with all conference and meeting chairs, storage and occasional furniture from Sedus, allowing the creation of room solutions from a single source.

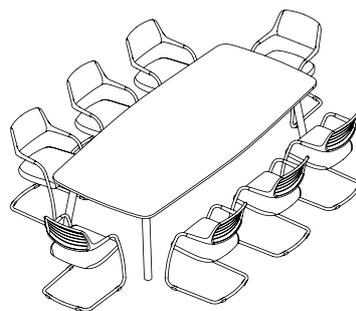

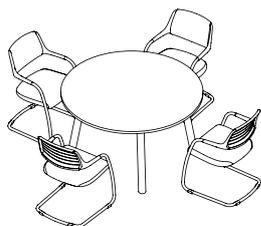

**Tableware.** Table protectors made of high-quality wool felt in a variety of shapes for use as placemats or coasters.

**Splashes of colour.** The protectors with a non-slip coating are available in five attractive colours.

**Round table.**

Ideal for intimate sit-downs, in the meeting room or individual office. Diameter: 1.3 m.

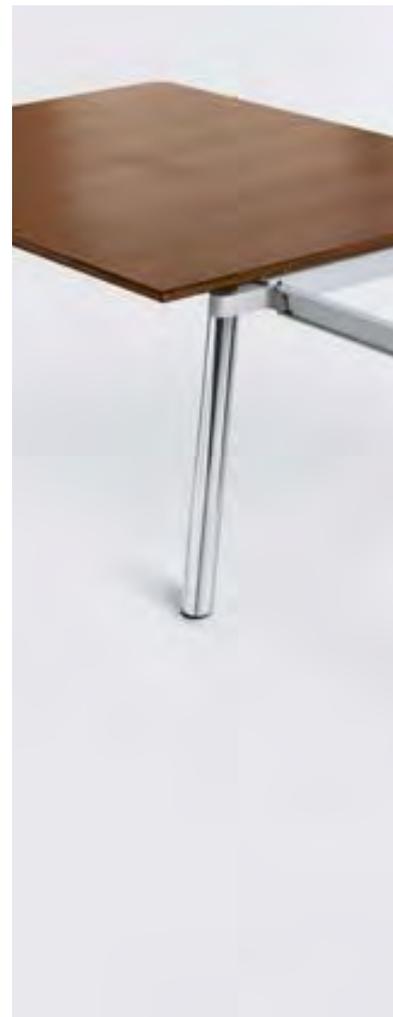

**Teamwork.** With seating for up to eight people, the mastermind boat-shaped individual table is just the right size for team meetings. Dimensions: 2.7 m x 1.2 m.

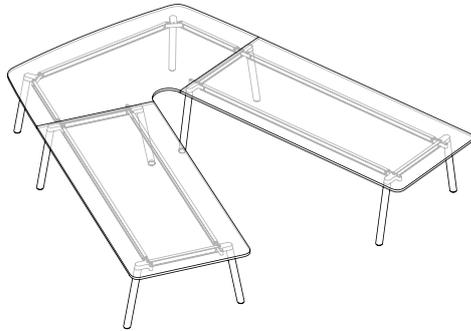

# Built for sound decisions.

With its clear, straightforward and simple construction – the result of extensive development work – the Sedus mastermind is clearly impressive. However, the real genius of the system lies beneath the table top. This is where cross-rails and corner knots meet table top and sturdy legs, offering entirely new ways of creating all kinds of conference suites with little effort. The all-round cross-rails perfectly support the table top, allowing the use of modules up to 2700 mm in

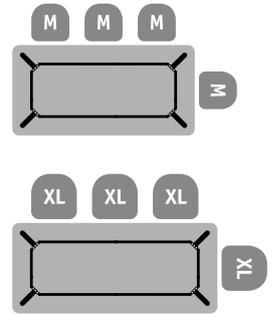

length and offering plenty of leg room when using up to three conference swivel chairs. The area underneath the table top is left free for integrated media technology and data and power outlets to be positioned wherever you wish. On this sound basis, Sedus mastermind also enables creative design using special shapes and individual dimensions with greater ease than ever before.

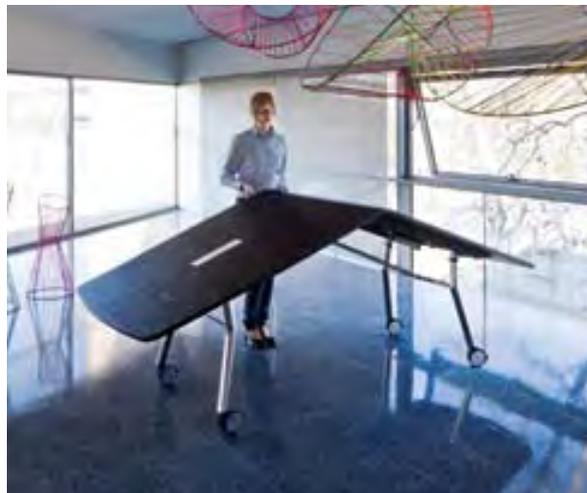

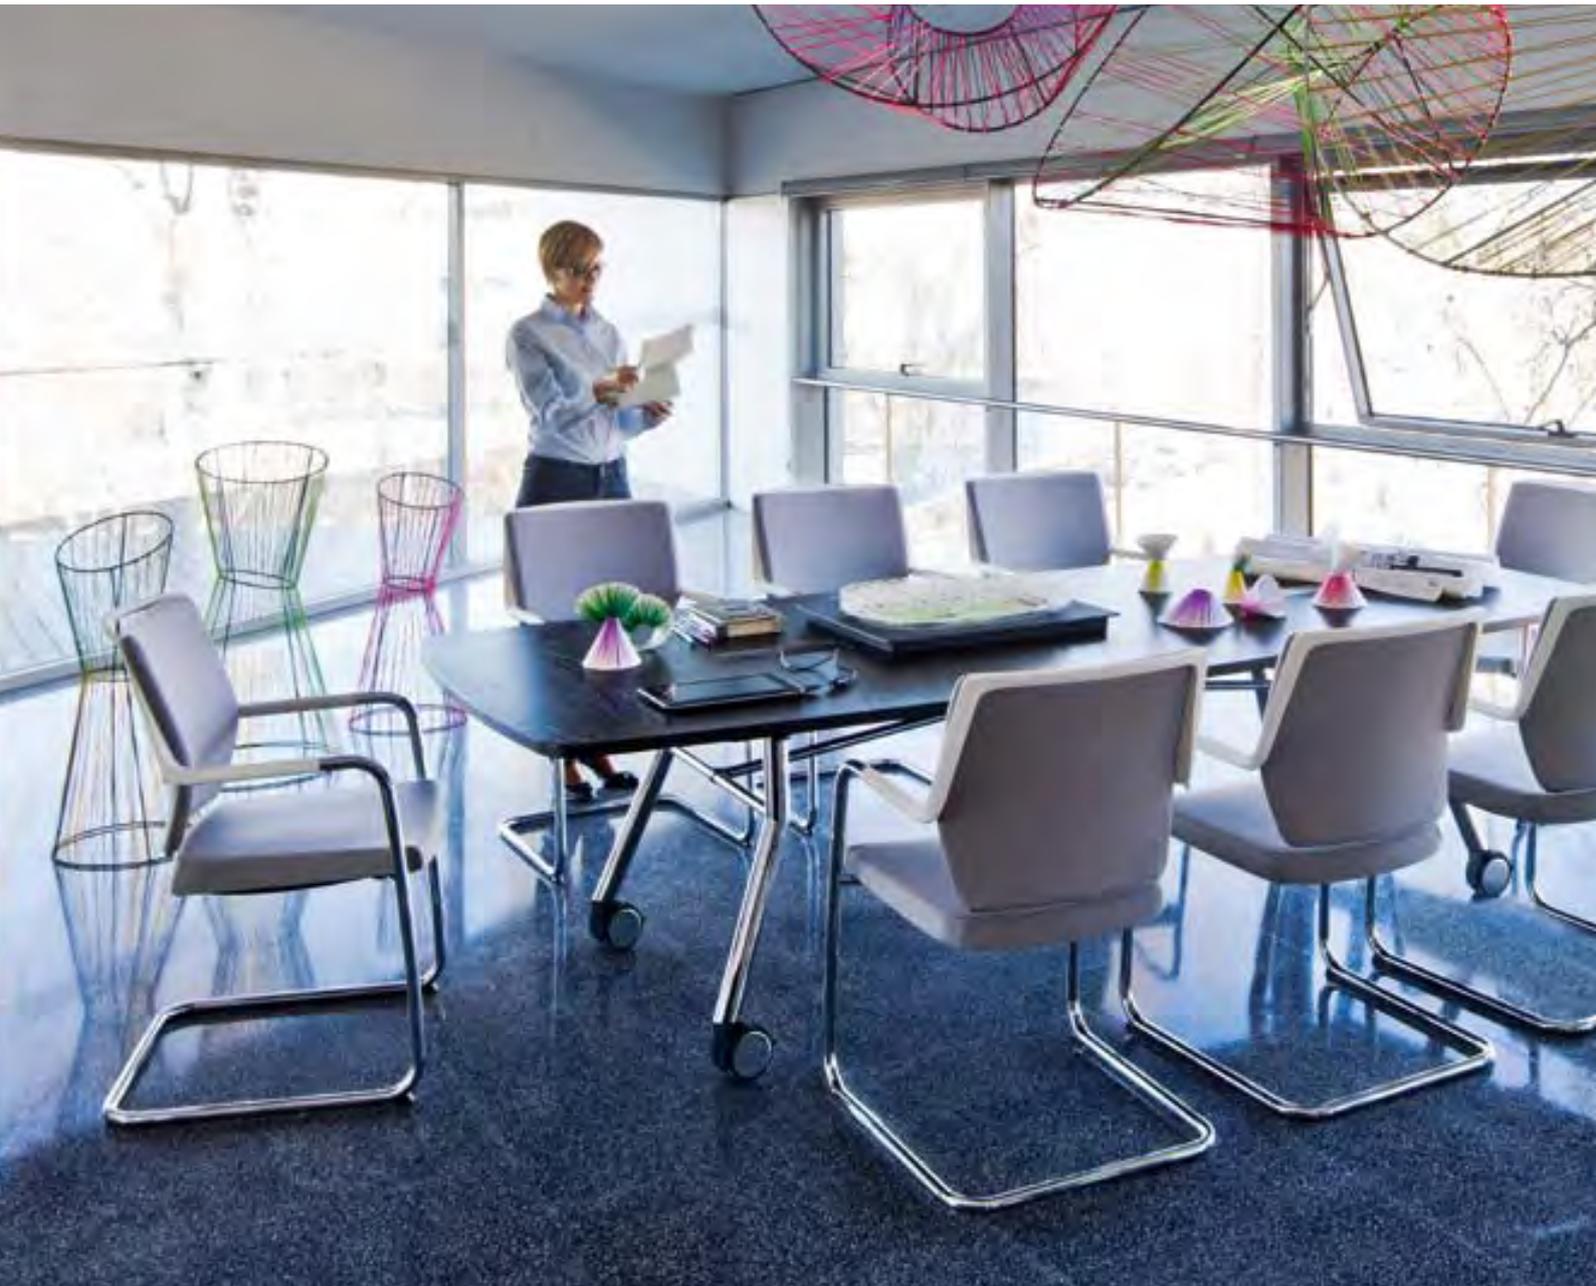

**Modular system.** The modular table system comprises rectangular start elements, interconnecting and end modules, as well as 30°, 90° and 150° angle elements. Together, they allow the configuration of a whole range of conference suites.

**Space.** Individual tables and table suites are designed for a certain number of seats, available in standard or comfort variations. If, for example, standard conference and visitor chairs are used, the seat width per place is approx. 700 mm; for conference swivel chairs it is a roomy 800 mm.

**Centrepiece.** The table top rests on angled circular tubes and cross-rails which can be joined at the corner knots.

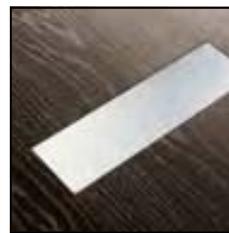

# Setting the stage for communication.

The clever solution for multifunctional rooms: Sedus mastermind fold – a high-quality, elegant conference table, which seats up to eight people and folds away compactly when it is no longer needed. Thanks to the sophisticated folding mechanism, you don't need to be the world's strongest person to set up and fold the table away by yourself.

The table tops automatically engage when unfolded thanks to the unique Sedus Securelock System, making them safe even before locking.

**Integrated.** There's plenty of room on the space-saving sub-structure for the integration of data and power outlets.

**Mobile.** Thanks to the generously sized castors, the folding table moves easily and smoothly.

**Protected.** Important for frequent use: all-round rubber edges protect both the table and other furniture in the room.

**Easy to use.** The smooth-running mechanism in conjunction with powerful gas springs ensures highly efficient transmission of power, so the table can be folded and unfolded quickly and easily.

# Media competence on the table.

Today, no conference and very few meetings can be held without presentation media, laptops or connection to data networks. For this reason, Sedus took media integration into account right from the start of development of the new mastermind system. As a result, all components can be seamlessly integrated, from the simple cable box in the individual tables to highly complex conference technology in large table suites, and as such, there's more freedom of movement and aesthetics.

## **Conference technology.**

Media and building technology can be controlled easily and conveniently on the optional integrated touch panel.

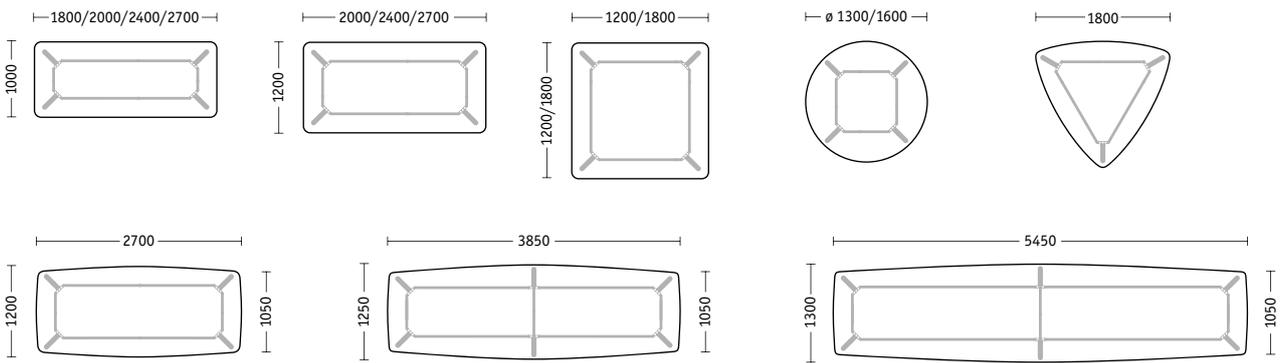

**Ready to go.** Power and network outlets are easy to access in the integrated media connector. Also, a high-quality projection mirror provides an elegant way of integrating the projector.

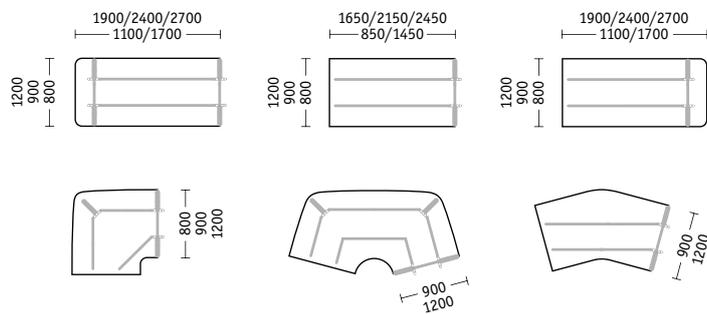

**Discreet.** Desirable in elegant conference suites: integrated power and data outlets are concealed beneath veneered socket flaps.

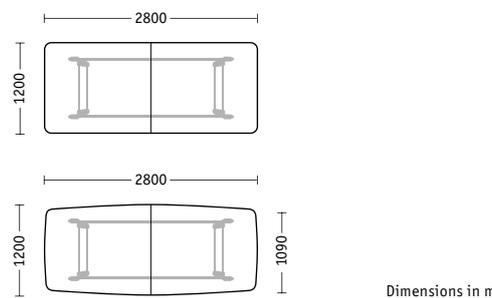

**mastermind Individual tables**

**mastermind Modular systems**

**mastermind Folding tables**

Dimensions in mm

**Cable guidance.**  
An elegant, high-quality knitted mesh provides vertical cable guidance, and can be fixed to the table top or the cable dump.

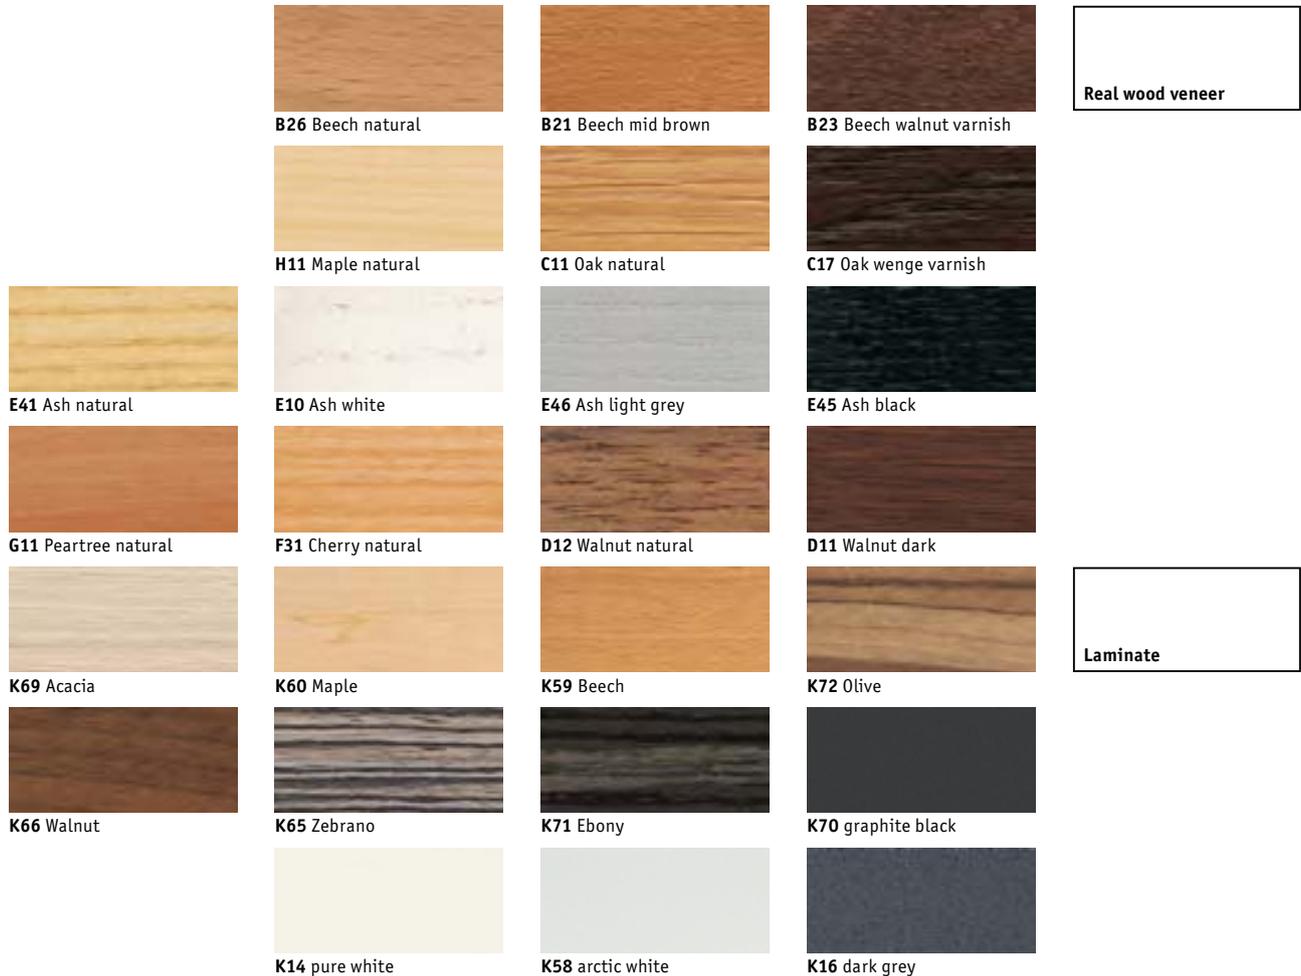

**Cable management.**  
The frame structure is ideally designed for the integration of media boxes. The cables can be laid in folding cable dumps, which can be placed wherever you wish.

**Modesty panel.**  
The optional modesty panels are made of high-quality mesh and are easy to mount. A discreet black, they fit in unobtrusively with any table design.

**Table edges.**  
For table suites, choose from a selection of classic edging as well as several attractive moulded edges, all manufactured in up to nine laborious working steps.

# Creative freedom with a concept.

## Surfaces.

The quality of the materials characterises the design and the visual quality of the conference tables. Easy-care laminate finishes and high-quality real wood veneers from sustainable sources are available. To match, there are classic edging and moulded edges.

## Table legs.

Made of sturdy tubular steel, powder-coated in white, white aluminium or chromed in Sedus' own electroplating plant with the most modern technology in the world.

# Companies, people and the environment all benefit.

Sedus is committed to transforming working in an office into a profitable experience for all. For the benefit of both companies and their employees. This mission statement is laid down in the corporate policy, to which the thoughts and actions of everyone at Sedus are bound. It is an ideal which encompasses all of the important aspects for office work today and tomorrow and, in order to achieve it, Sedus relies on the areas of competence Holistics and Customer Orientation, Quality and Sustainability, and the concept Place 2.5.

With the concept Place 2.5, Sedus has developed a unique and innovative approach – the new office culture of productive well-being. The concept is based on perfect ergonomics, functionality and working conditions, and is embedded in office environments designed to enhance well-being, in which people like to work, and are therefore more productive. Design, light, acoustics, atmosphere and air are just some of the most important elements.

The concept is testimony to Sedus' holistic and customer-orientated way of thinking. After all, companies today do not need more pieces of office furniture, but rather seamless and needs-orientated solutions for efficient working processes. They need future-proof office working environments that are

consistent with the corporate culture. Sedus delivers just that with its comprehensive, flexible product range catering for all requirements and with its individual consulting and planning services.

Quality and sustainability have ultimately been the cornerstone of Sedus' success for more than 50 years now. In addition to working in a way that conserves resources, designing products which are recyclable, using ecologically tested materials and being energy-aware in its manufacturing, Sedus pursues one thing above all else: product quality that lasts, because that's what is best for the environment.
